- **Security Checks**
- **Improve Customer Services**
- **Record Utility Meter Readings**

- **Cash Sale & Ticket Printing**
- **Short Term Booking and Sales**
- **Portability**
- **Operational Information in Your Pocket**

PocketMMS is a portable extension of PacsoftMMS which allows you to perform key PacsoftMMS functions from a hand held Pocket PC, regardless of where you are in the marina! PocketMMS is easy to learn and use. Marina Operatives and Security Staff can easily perform a range of tasks whilst out on the marina.

Upon return to the office, information saved on the pocket PC can be uploaded and synchronised with PacsoftMMS for processing, analysis, and reporting. No re-keying of information is required, and you and your staff can now spend more time out on the marina with your customers.

Improved Customer Service

Impress your customers with that 'extra' level of customer service with Pacsoft PocketMMS. Your staff now have access to customer, berth, site, vessel and other important information from the Pocket PC, they can make visitor rental bookings, generate invoices and complete cash sales instantly out on the marina!

Spend more time with your customers! Do not be tied to the office.
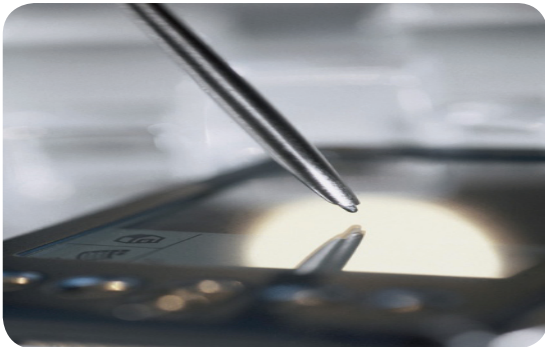

Information Availability

Key marina information can be easily accessed via the Pocket PC while away from the marina office including details of sites / berths, vessels, customers, as well as berth occupier dates, meter reading recording and more! Ideal for small and large marinas, or for security staff. Important and convenient in the event of emergencies.

Pier Check

Record and confirm the status of occupancy while doing pier checks and dock walks in the marina. Create and record exceptions (e.g. report a vessel in the wrong berth)

Meter Reading

Record utility meter readings such as electricity usage, fuel, and water as and when your staff are measuring the readings. You can also generate invoices for these charges at the same time with the portable PocketMMS.

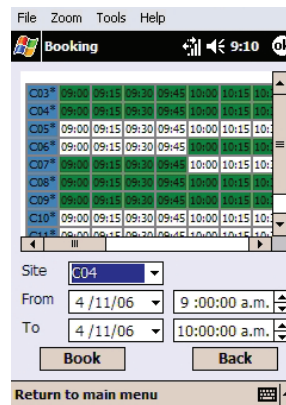

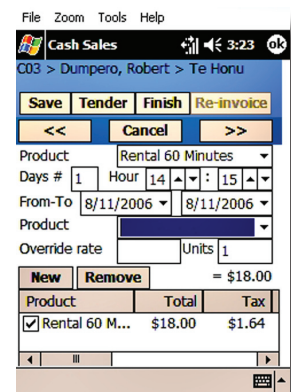

Online Booking & Cash Sales

Real-time Online Booking while on the marina. Book short term stays, casual sales and provide a receipt ticket whilst on the marina. By using either a wireless or GPRS network, bookings made on the Marina can be completed live in real time on the main PacsoftMMS database all from PocketMMS - ideal for busy event based marinas, or marinas with high visitor throughput, where up to the minute berth availability and occupancy information is crucial.

Cash Sales & Ticket Printing

Spend more time out on the marina with your customers.

With PocketMMS you can also print invoices for casual rentals and cash sales anywhere on the marina! The header and footer on the ticket can be customised to suit your business requirements.

PocketMMS Visitor Sales and Ticket Printing is ideal for Marinas with large volumes of visiting vessels.

Conversion Calculator

A very handy tool for marina staff. The conversion calculator can quickly perform currency conversion calculations for your foreign visitors. The calculator does more than just currencies. It is fully customisable to your requirements such as quick conversions on length, weight, time, and more.
